Small Poles - Bollard H.350 Emission 360°

Rev. 30/10/2023

Naos has been developed to cover various residential lighting needs for paths, gardens and avenues. This new bollard is presented with two different optics, the first, with a white diffuser (Naos400), designed to satisfy the need for more lux. The second version (Naos401), on the other hand, with a black reflector, guarantees anti-glare and exceeds all anti-light pollution regulations. Both versions are proposed with powers of 14W and 20W.
